Technology at work for you

IMPLEMENTING SOLUTIONS FOR A SAFE AND SECURE FUTURE.

Our CCTV, Access Control and Intruder detection solutions range from basic standalone systems through to complex digital remote monitored systems spanning across the UK and Europe. We are accredited to SSAIB standards allowing us to offer full police response for all of our systems. Our internet integration modules allow you to monitor your systems from anywhere in the world either via a web browser, smart phone or via one of our custom built software solutions.

Conventional and Addressable fire detection systems can be provided to give you peace of mind that your property is fully protected from the risk of fire. Our systems can provide alarm centre monitoring to dispatch the fire service should the fire alarm systems be activated. Incorporating full DDA compliance will ensure that the systems installed comply with every standard including BS5839-1:2002.

CUSTOM SOLUTIONS

We can build custom made bespoke solutions to fit your needs, our team of software and electronics developers can work with you to design create and support the exact solutions no matter how complex they may be.

SERVICES PROVIDED

- CCTV SYSTEMS.
- INTRUDER DETECTION SYSTEMS.
- ACCESS CONTROL SOLUTIONS.
- FIRE DETECTION SYSTEMS.
- ANPR SYSTEMS.
- LOCAL & REMOTE MONITORING.
- BESPOKE DEVELOPMENT.
- TRACKING SOLUTIONS.
- ASSET MONITORING.
- DATA & VOICE INFRASTRUCTURE.

flexible solutions for your business needs

Tracking Solutions

Have you ever had a vehicle stolen? Have you ever wanted to know where your company vehicles are, how they got there and at what speed?? With our digital tracking solutions we can provide real time or historical location data of your vehicles or assets. We can offer three platforms to provide you with the solution you require. Using SMS, GPRS or M2M technology we can give you a tracking solution that will fit your budget with ease. We can also offer full European coverage with our mirrored servers located across Europe. Call now for a demonstration.

Data & Voice solutions

Our Data and Voice solutions cover much more than just data and voice cabling, alongside the structured cabling solutions in which we provide we also offer complete IT infrastructure solutions, inclusive of data communication systems, wireless technology, YMAX and WAN technology. Desktop support, PC Supplies and custom industrial computer systems are also a part of our portfolio. Digital and IP Voice solutions can also be provided with many feature packs and options.

TECHNOLOGY CONSULTING PROVIDES A TOTAL END TO END SOLUTION.

Software and Electronic Development

We are proud to employ a team of software and electronics developers to design and build bespoke systems in which can achieve a vast array of outcomes.

No matter what your requirement, we can design and develop a system that will cater for your needs. Working with the latest development tools, IT server technology and electronic development platforms we can produce exactly what you require, and all in a very sensible cost effective budget, for example:

- Custom Security platforms.
- Integrated ANPR systems with remote data lookup.
- Automotive systems and mobile data solutions.
- Power and Electrical management systems.
- Data recording and monitoring systems.
- Automation systems, human to machine integration.
- Digital advertising solutions and remote media management.

WEB SOLUTIONS

Almost all of our systems can be monitored or controlled via the Internet or via private corporate networks; some of these systems are "off the shelf " solutions others can be custom made to ensure you receive the solution you require. Integrated Web tools like "Google Earth" can also be used to add even more functionality to your systems.
